# This is how much I currently know about ASD

# Autism Spectrum Disorder

A **neurodevelopmental** disorder with onset in the developmental period that causes changes in brain function resulting in:

- Persistent qualitative impairment in
  - Reciprocal social interaction
  - Verbal and nonverbal communication

As well as presence of:

- Restricted, repetitive patterns of behavior, activities and interests

# What We Know About ASD

- ASD occurs in all racial, ethnic and socioeconomic groups
- Ratio of boys to girls is 4:1
  - Boys: 1:37
  - Girls: 1:151
- CDC, March 2022 prevalence rate:
- 1 in 44
- <https://www.cdc.gov/ncbddd/autism/data.html>

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# NESD Head Start – by the numbers

330 is the maximum number of students allowed.

1:44 is the incidence of ASD (CDC 2022)

**7.5 students with ASD within the NEHS system**

# ASD for Educators - CDC

[Information on Autism Spectrum Disorder for Educators | CDC](#)

# Causes

- Genetic component [Genetics Explained](#)
  - About 100 gene mutations have been identified
- Siblings: [Sibling Incidence](#)
  - Identical twin = 80%,
  - Fraternal twins = 40%

# Causes

- Environmental factors that could affect the baby in utero may increase the risk  
[Environmental factors](#)

# Causes

Current research is that ASD is not caused by immunizations

[Vaccinations do not cause autism](#)

[Frequently Asked Questions | CDC](#)

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Risk Factors

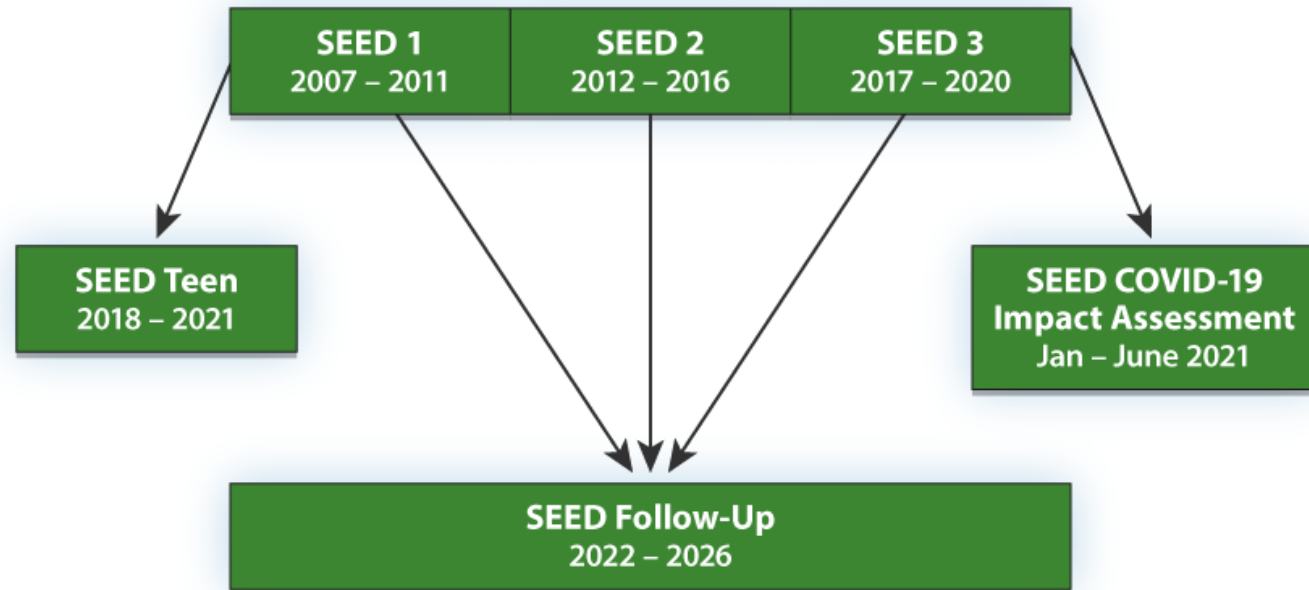

- Having a parent or sibling with ASD
- Children born to older parents are at a higher risk
- Having certain genetic or chromosomal conditions (Fragile X or TSC)
- Children who are born prematurely or experience complications at birth
- Commonly occurs with other developmental, psychiatric, neurologic, chromosomal, and genetic diagnoses

# SEED Study to Explore Early Development - CDC

# IDEA Sec. 200.8 (c) (1) (i)

(i) Autism means a developmental disability significantly affecting verbal and nonverbal communication and social interaction, generally evident before age three, that adversely affects a child's educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences.

(ii) Autism does not apply if a child's educational performance is adversely affected primarily because the child has an emotional disturbance, as defined in paragraph (c)(4) of this section.

(iii) A child who manifests the characteristics of autism after age three could be identified as having autism if the criteria in paragraph (c)(1)(i) of this section are satisfied.

# DSM-5 TR Diagnostic Criteria for ASD

- Persistent deficits in **social communication** and social interaction across multiple contexts, as manifested currently or by history (**3 criterion**)
- **Restricted, repetitive** patterns of behavior, interests, or activities, as manifested by at least two of the following, currently or by history (**4 criterion**)
- Symptoms must be present in the early developmental period (but may not become fully manifest until social demands exceed limited capacities or may be masked by learned strategies in later life).

When poll is active, respond at [pollev.com/brittanyschmidt582](https://pollev.com/brittanyschmidt582)

Text **BRITTANYSCHMIDT582** to **37607** once to join

## Which are the core criterion for ASD?

Social, Play, Repetitive Behaviors and Patterns of Behavior

Social Communication and Repetitive Patterns of Interest and Behavior

Communication, Sensory Differences, Repetitive Patterns of Behavior

Challenging Behaviors, Social Communication and Repetitive Patterns of Interest and Behavior

Powered by  **Poll Everywhere**

Start the presentation to see live content. For screen share software, share the entire screen. Get help at [pollev.com/app](https://pollev.com/app)

# DSM-5 TR Diagnostic Criteria for ASD

- Symptoms cause clinically significant impairment in social, occupational, or other important areas of current functioning.
- These disturbances are not better explained by intellectual disability (intellectual developmental disorder) or global developmental delay. Intellectual disability and autism spectrum disorder frequently co-occur; to make comorbid diagnoses of autism spectrum disorder and intellectual disability, social communication should be below that expected for general developmental level.

# DSM-5 TR Diagnostic Criteria for ASD

- Persistent deficits in social communication and social interaction across multiple contexts, as manifested currently or by history (**must meet all 3**)
  1. Deficits in social-emotional reciprocity, ranging, for example, from abnormal social approach and failure of normal back-and-forth conversation; to reduced sharing of interests, emotions, or affect; to failure to initiate or respond to social interactions
  2. Deficits in nonverbal communicative behaviors used for social interaction, ranging, for example, from poorly integrated verbal and nonverbal communication; to abnormalities in eye contact and body language or deficits in understanding and use of gestures; to a total lack of facial expressions and nonverbal communication
  3. Deficits in developing, maintaining, and understanding relationships, ranging, for example, from difficulties adjusting behavior to suit various social contexts; to difficulties in sharing imaginative play or in making friends; to absence of interest in peers

# Severity Level Social Communication

Requires Very Substantial Support:  
Severe deficits in verbal/nonverbal  
communication, limited initiation,  
minimal response to others

Level 3

Level 2

Requires Substantial Support:  
Marked deficits in verbal/nonverbal social  
communication; social impairments even  
when supports in place, limited initiation  
of interactions, limited social overtures

Level 1

Requires Support:  
Without Support, marked deficits in social  
communication, difficulty initiating interactions,  
unusual responses to social overtures. Decreased  
interest in social interactions

# DSM-5 TR Diagnostic Criteria for ASD

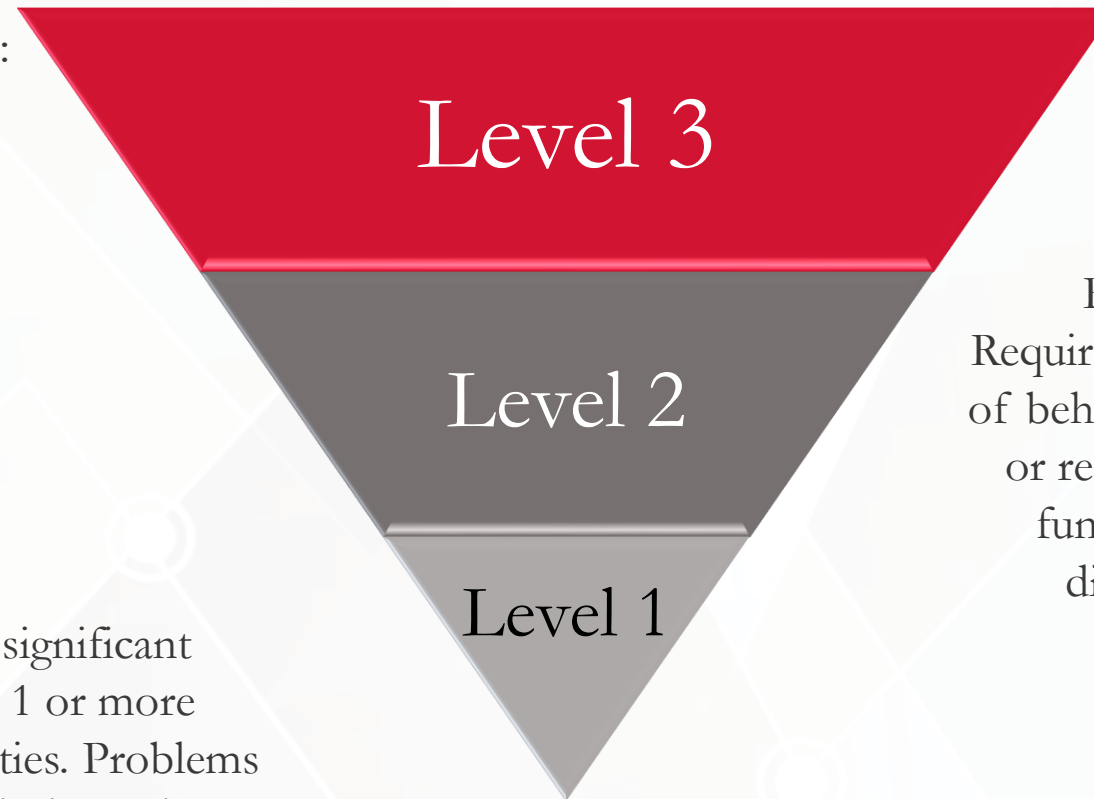

- Restricted, repetitive patterns of behavior, interests, or activities, as manifested **by at least two** of the following, currently or by history:
  1. Stereotyped or repetitive motor movements, use of objects, or speech (e.g., simple motor stereotypes, lining up toys or flipping objects, echolalia, idiosyncratic phrases).
  2. Insistence on sameness, inflexible adherence to routines, or ritualized patterns of verbal or nonverbal behavior (e.g., extreme distress at small changes, difficulties with transitions, rigid thinking patterns, greeting rituals, need to take same route or eat same food every day).
  3. Highly restricted, fixated interests that are abnormal in intensity or focus (e.g., strong attachment to or preoccupation with unusual objects, excessively circumscribed or perseverative interests).
  4. Hyper- or hypo-reactivity to sensory input or unusual interest in sensory aspects of the environment (e.g., apparent indifference to pain/temperature, adverse response to specific sounds or textures, excessive smelling or touching of objects, visual fascination with lights or movement)

# Severity Level Restricted & Repetitive Behaviors

Requires Very Substantial Support:  
Inflexibility of behavior, extreme  
difficulty coping with change or  
repetitive behavior interferes with  
functioning in all areas. Great  
distress over change

Requires Support:  
Inflexibility of behavior causes significant  
interference with functioning in 1 or more  
contexts. Difficulty switching activities. Problems  
organization and planning hinders independence

Requires Substantial Support:  
Requires Substantial Support: Inflexibility  
of behavior, difficulty coping with change  
or repetitive behaviors, interferes with  
functioning in all areas. Distress or  
difficulty with change of action

# This is how much I currently know about ASD

# Cognitive Characteristics

## Weaker Areas

- Abstract thinking
- Auditory skills
- Reasoning
- Imitation
- Generalization
- Long-term planning
- Summarizing
- Perceiving emotions
- Expressing feelings

## Stronger Areas

- Concrete thinking
- Punctuality
- Visual skills
- Memory
- Honesty
- Detail oriented
- Intense focus
- Logical thinking
- Following rules

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Structured Teaching TEACCH ®

Training and Education of Autistic and Communication Related  
Handicapped Children

The University of North Carolina TEACCH Autism Program

[www.teach.com](http://www.teach.com)

# Philosophy Basis of Structured Teaching

1. Relative strength in and preference for processing **visual information**
2. Heightened attention to **details** but difficulty deriving meaning from them
3. Enormous variability in **attention**
4. **Communication** problems, especially pragmatic
5. Difficulty with concepts of **time**; problems recognizing beginning or end of an activity, how long the activity will last, and when it will be finished.
6. Tendency to become attached to routines and settings, difficult to **generalize**, and disruptions can be uncomfortable, confusing, or upsetting.
7. Very **intense interests** and impulses to engage in favored activities and difficulties disengaging once engaged.
8. Marked **sensory** preferences and aversions.

# Why Utilize Structured Teaching?

- Increases understanding of the world
- Improves learning outcomes
- Helps people remain calm, less agitated
- Helps achieve independence
- Reduces challenging behaviors
- IT WORKS!!!!!! (Savner & Myles, 2000)

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Additional Reasons.....

- Allows for individualization
- Makes environments predictable
- Decreases behaviors by decreasing confusion
- Allows for controlled compromise
- Preparation for adult life
- Improves self-esteem

# In the absence of structure...

# \*Elements of Structured Teaching\*

1. Physical Structure

2. Daily Schedule

3. Work System

4. Visual Structure of Tasks

- Instruction
- Clarity
- Organization

# 1. Physical Structure

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Physical Structure

- How a space is organized
- How are materials and furniture arranged to provide context and meaning to the environment
- Helps person with autism understand what is expected
- Defines the environment using naturally occurring boundaries

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Physical or Visual Boundaries

- Defines the beginning and ending of a space
  - What are examples of boundaries, either physical or visual?
- Establishes context and function of each area
  - What are examples of functions of classroom areas?

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Basic Teaching Areas

- Group/Snack Area
- Play/Leisure/Break
- Work areas:
  - 1:1 instruction area
  - Independent work area
- Transition Area
  - A neutral place to receive information
  - A place for the daily schedule

# Group Area

What shows the purpose of this area?  
What is an important physical cue?

UNIVERSITY OF  
**SOUTH DAKOTA**  
SANFORD SCHOOL OF MEDICINE

# Independent Work Area

What physical boundary is used?  
What objects provide cue for what happens in this place?

# Work Area

# Independent Work Area

What are the visual cues in this area?

# Independent Work Area

- How does the student know what to do here?
- What do you notice about the table on the left?

UNIVERSITY OF  
**SOUTH DAKOTA**  
SANFORD SCHOOL OF MEDICINE

# Work Area (and 1:1 area)

# Work Area

# Independent Work Area

# Independent Work Areas

What are advantages to this setup?

# 1:1 Teaching Area

1:1 or Independent ?

<http://raising-teaching-children.blogspot.com/2015/10/structured-teaching-strategies-for.html>

# 1:1 Teaching Area

?

What is the difference between a teaching area and an independent work area in a structured work system? Why is the differentiation important?

# Transition Area

What is a transition area?  
Why should you have one?  
What things might you find there?

# Other Areas

# Play Area

# Play/Leisure Area

# Play Area

UNIVERSITY OF  
**SOUTH DAKOTA**  
SANFORD SCHOOL OF MEDICINE

# Outside Play Area

# Eating Area

UNIVERSITY OF  
**SOUTH DAKOTA**  
SANFORD SCHOOL OF MEDICINE

UNIVERSITY OF  
**SOUTH DAKOTA**  
SANFORD SCHOOL OF MEDICINE

## 2. Schedules

# Schedule

Tells **WHERE** to go,

not **WHAT** to do

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Visual Daily Schedule

- Visually represents what activities will occur and in what sequence
- Tells What Happens Next and Where
- Tells the individual the concept of discrete events and the difference between activities
- Decreases "Power Struggles"
- Teaches the individual how to anticipate events

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# **\*Types of Daily Schedules\***

- Object-to-object sequence
- Single photos
- Part-day pictures or photos
- All day picture/photo
- All day picture cards and written list
- All day written and written lists
- Left to right or top to bottom

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Individualization

- Must assess
- Type of visual cue
  - Object, photo/label, picture symbol, word
- Length of Schedule
  - Single, partial, half day, whole day
- Arrangement of Schedule
  - Left to Right/Top to Bottom
- How manipulated/where located/travel

# Individualize!!

# Object Schedule

# Top to Bottom Object Schedule

# Left to Right Object Schedule

# Photo Schedule

# Full Day Photo Schedule

# Picture Symbol Schedule

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# “Check Schedule” Card

- Visual support to direct individual TO their schedule or transition area to receive information about where they are going to go next (next thing on their schedule)
- This can be a card with their name on it. A piece of construction paper. A chip. Anything that is a token for getting them TO their schedule.
- <https://www.iidc.indiana.edu/pages/transition-time-helping-individuals-on-the-autism-spectrum-move-successfully-from-one-activity-to-another>

# Picture Symbol Schedule

The check schedule card in this photo is a T-shirt shaped icon with the child's name on it.

# Written Schedule on Board

A photograph of a yellow board with a handwritten schedule. At the top of the board are alphabet strips showing letters: 'lll', 'nn', 'oo', 'pp', 'qq', 'rr', 'ss', 'tt'. The schedule is written in black and orange ink. The date 'Wednesday, August 2, 2000' is written at the top. The schedule lists activities and times in two columns. The first column lists activities from 9:00 to 10:30. The second column lists activities from 11:00 to 1:00. Times are written in orange ink, while activities are in black ink.

Wednesday, <u>August 2</u> , <u>2000</u>	
9:00 Reading	11:00 Outside
9:20 Break	11:30
9:40 Handwriting	11:45 Break
10:00 Break	12:00 Lunch
10:15 Snack	12:30 Break
10:30 Math	12:45
	1:00 Home

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Routines

- Routines are used in combination with visual schedules and are sometimes called mini-schedules.
- They create a plan for activities that occur within a student's schedule, for example, routines in a certain class, circle time, recess, heading a paper, or toileting.
- Once a student knows the basic routine, the teacher may change specific content of the task.
- Predictable routines decrease anxiety and increase independence.

# Example of a Routine

Bathroom

Walk in the bathroom stall, close the door.

Use the toilet, wipe, button and zip your pants, flush

Open the door.

Wash and dry your hands.

# Visual Routine – hand washing

## 4. Visual Structure of Tasks

- Visual Clarity
- Visual Instruction
- Visual Organization

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# \*Visual Structure of Tasks\*

- Teach individuals using visual methods to:
  - capitalize on visual strengths and aptitude.
  - minimize their deficits of auditory processing.
    - Visual Instruction
    - Visual Clarity
    - Visual Organization

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Visual Instruction

- Tells order & sequence of a task
- Helps the individual combine and organize a series of steps to obtain a desired outcome
- Provides an overall method for teaching the individual a way to approach an activity or task
- Use to teach flexibility and generalization

# Visual Instruction Object Level

# Visual Instructions at Centers

# Visual Instructions for Home Routines

UNIVERSITY OF  
SOUTH DAKOTA

# Choice Board

# Written Aids

# Visual Reward System

This week I am working for:

Sunday Monday Tuesday Wednesday Thursday Friday Saturday

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Looking Towards the Future:

- Teach using clear, structured visual tasks
- Teach the process of following the direction and looking for visual cues
- Transfer the visual system to other environments.....  
Generalize; Blend.
- Teach the individual to look for visual information in different environments

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Dangerous Assumptions:

1. He knows the routine; he doesn't need the structure.
2. But she's verbal; we don't want her to be dependent.
3. He knows what to do; he is choosing to be noncompliant.
4. She's choosing not to pay attention.

**NEVER FADE THE STRUCTURE....**  
**Blend IT!!!!**

# Review: Elements of Structure

- Physical Structure :
  - organizing the environment and physical space
- Daily Schedule:
  - tells where activities will occur and in what sequence
- Work Systems:
  - tells what work, how much work, when finished, and what next

# Review: Visual Structure Considerations

- Helps the individual know how to approach a task and look for relevant information through:
  - Visual Instruction
  - Visual Clarity
  - Visual Organization

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Considerations for Work Tasks

- Relevant to student's needs, goals, skills
- Functional
- Independent
- Change frequently
- Beware of meaningless tasks

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Remember

- Structured teaching methods:
  - Can be applied at all developmental levels and do not restrict the curriculum.
  - Use a concrete, visually-based instructional approach to emphasize individual strengths.
  - Help individuals develop a level of independence needed for success across settings and into adult life.

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Just because you build it.....

Must teach and reinforce what you provide to the learner:

Schedule

Work System

Reinforcement

Visual Supports

# Assessment

- Interests, preferences, dislikes
- Sensory needs
- Reactions to change
- Communication system
- Level of independence in various situations
- Learning strengths and deficits
- Gaps in understanding and use of language

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Assessment (continued)

- Understanding of and use of social skills/rules
- Ability to focus on pertinent details
- Ability to manage anxiety/relax

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Informal Assessment of Skills

- Choose assessment area (see handout)
  - Play and pre-academic (for today)
- Collect information
  - Present materials to the individual
  - Presentation rate is the structure
  - Take data

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# What to look for:

- Emerging Skills
- Strengths
- Weaknesses
- Interest Level
- Work Habits
  - organization, distractibility, attention span, independence, motivation, sensory

# Assessment Forms

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

Informal Assessment of Play			
Area	Interest	Skill	Notes
<b>EXAMPLE</b> <b>Math:</b> Matching analog to digital clocks 2 -digit addition with carrying Counting by 20's to 100	H M L H M L H M L	Pass Emerge Fail Pass Emerge Fail Pass Emerge Fail	60% accuracy Did not carry, doesn't have facts Error at 80 to 100
<b>Arts and Crafts</b>	H M L H M L H M L H M L	Pass Emerge Fail Pass Emerge Fail Pass Emerge Fail Pass Emerge Fail	
<b>Puzzles</b>	H M L H M L H M L H M L	Pass Emerge Fail Pass Emerge Fail Pass Emerge Fail Pass Emerge Fail

# Do I have time for this?

Time it takes my  
students to  
learn without  
structure

Time needed to work  
through a challenging  
behaviors

Time needed to lead students through  
things without structure

Time to  
make and  
set up the  
structure

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Criteria for selecting objectives:

- Developmentally appropriate?
- Functional?
- Independent?
- Coordination with family priorities?

UNIVERSITY OF  
SOUTH DAKOTA  
SANFORD SCHOOL OF MEDICINE

# Be teachable yourself

- Collaboration is key
- What is important to us, may not be seen as important to family
- Look at the big picture of the person's life, what will they need to succeed

# A word about Velcro.....

Building wide – decide what side of the Velcro will be on the item carried/transported and what side will be on the schedule or work system.

# Work Time!

## Materials

Tag board, Construction Paper, Velcro, Laminator, computer, printer, objects, containers,

## Ideas

Schedule, work system, assessment basket(s), meeting time to determine when, where, who, how
